Highlights

Carbon footprint
Energy savers reduce the amount of energy in your home, which not only results in a lower eenrgy bill, but also in less carbon (CO2) output by your energy supplier. Together we make this a better world to live in.

Energy efficient
All Philips energy savers save energy from the moment you turn the switch. During their lifetime they use fewer kW and thus also result in a lower energy bill. The level of energy saving differs per lamp type and technology.

Reliable quality
Philips keeps its promises about lamp performance. You can trust what the Philips packaging is saying about light output, lifetime and wattage equivalent to incandescent lamps.
